Announcing 3E: New Financial Management and Accounting System

We're excited to share that in early 2016 we will be rolling out a new financial management and accounting system called Elite 3E. This new system will replace many of our existing systems, streamlining many processes. Because this change will affect all lawyers and many staff members, we are putting together a comprehensive communications and training plan around this new platform.

3E is going to be fantastic. Here are just a few reasons we are so excited about this new system:

- Deeper access to data. This robust platform will allow attorneys and their assistants to have access to much deeper financial and statistical data for their clients.
- Custom Reporting. 3E allows for custom reporting of financial and statistical data for your clients as you need it, from your desktop.
- The ability to edit proformas online.
- Ability to enter time online.

3E will replace the following current systems:

- Enterprise Accounting system
- Webview Time Entry
- Webview Client/Matter Lookup
- Webview Records Request
- MetaStorm New Client/Matter Intake
- MetaStorm Conflicts
- Accounts Receivable Collections System (ARCS)
- Eureka and FRX Reporting Systems

We plan to go live with this new system April/May 2016. Stay tuned for much more information about 3E.
